

Practical Clinical Applications World Class Programs

For Health Professionals and Fitness Professionals

Limited to 10 Participants
Small Group Workshop Format - Practical Clinical Learning

Seminar Dates:

Level One: April 10-11, 2010 - Mississauga, Ontario

A *fit, healthy* or *flexible* golfer *isn't* necessarily a *better* golfer *or* an *injury free* golfer. Physical programs must intentionally change swing biomechanics. Do you know how to analyze a client's physical swing biomechanics? Learn how to apply functional physical testing. Develop a working understanding of golf swing biomechanics through an introduction to 3-D Motion Analysis. Go beyond the golf fitness fad and create real performance changes in a golfer. Incorporate what is done with the best players in the world within your office - Low cost, No Expensive Equipment. With sound science and clinical applications you can run a world class program.

Level Two: May 8 - 9, 2010 - Mississauga, Ontario

Every athlete & body is unique. The new paradigm in athletic performance is highly individualized evaluations and targeted functional training. Functional Screens on their own are incomplete ... set yourself apart as an expert in the field of golf fitness. Incorporate 3D Motion Analysis easily and inexpensively. Gain the value of using 3D in multiple sport applications. Learn advanced training protocols to dramatically increase swing speed in elite and professional golfers. This is what is being done with the best players in the world. Superior knowledge, low overhead - run world class programs and impact your client's swing purposefully and intentionally.
